Section: III-BINS

FINAL CERTIFICATION 1

Introduction to Modern AI

Description: "Introduction to Modern AI" is a beginner-friendly course designed to demonstrate how artificial intelligence can simplify everyday tasks, from completing homework to drafting emails. The material covers the basics of how AI works, including techniques for spotting when a chatbot makes things up and understanding when to use private, offline AI tools. Next, the curriculum explores how AI processes images and audio. This involves using photo apps to identify objects, training basic models to recognize shapes, and applying translation tools to read foreign text directly from pictures. Finally, the course dives deep into chatbots, providing strategies for giving effective instructions so the AI writes in a specific, desired style. The program concludes with hands-on practice using over ten popular tools, including ChatGPT, Gemini, Claude, and Google Translate, building the confidence needed to seamlessly integrate AI into daily workflows.

Total Number of Training Hours: 6 hours
